✓ Mistral has raised \$7.5 billion since its 2023 inception as reported by Crunchbase in September 2026.

REJECTED CLAIMS (KEPT OUT OF THE MEMO)

- None — every extracted claim passed.

SKEPTIC REVIEWS

1. **Round 1: needs work**

[q4] The total funding amount of \$7.5B and the €1.7B Series C round are dated September 2025, which is in the future relative to the current date, indicating likely inaccurate or speculative data. → *Search for the latest actual funding history of Mistral AI up to the present (2026-10) from reputable sources such as Crunchbase, PitchBook, or official press releases, and verify the total amount raised and dates of rounds.*

[q5] ARR estimate of \$400million is for January 2026, a future period, and relies on a single source (Sacra) without corroboration. → *Find recent (2024-2025) revenue or ARR figures for Mistral AI from multiple independent sources (e.g., analyst reports, interviews, financial filings) to confirm current traction.*

[q6] Competitors and market size are still open with no evidence provided. → *Research analyst reports, market research firms, and industry articles to identify Mistral AI’s main competitors and estimate the size and growth dynamics of its target market.*

[q7] Significant news events in the past 12 months are not addressed, leaving a gap in recent developments. → *Search news databases for Mistral AI coverage over the last year to capture product launches, partnerships, regulatory issues, or other notable events.*

2. Round 2: needs work

[q4] Total funding amount of \$7.5 billion appears unusually high and is based on a single Crunchbase news article; need corroborating sources and clarification of currency/valuation vs. amount raised → *Search for additional reputable sources (e.g., PitchBook, Reuters, company press releases) confirming total capital raised and break down by round*

[q7] No evidence provided for significant news events in the past 12 months; this gap leaves the memo incomplete → *Search recent news articles (2023-2024) for Mistral AI regarding product launches, partnerships, regulatory issues, or leadership changes*

[q5] ARR figure of \$400 million from Sacra is a single, non-independent estimate and may be outdated; needs validation → *Find independent financial analyses or credible news reports that confirm Mistral AI's revenue or ARR figures*

[q10] Strategic partnership information is missing despite being a priority-3 question; lack of data could affect growth assessment → *Search for announcements of partnerships or alliances involving Mistral AI in the last 12 months*
